

BIG NEWS... DrsLink has partnered with Transworld Systems to create a NextGen interface. Transworld is the MGMA AdminiServe Partner focused on providing healthcare organizations with better tools for internal collection of accounts receivable. *Now, it's easier than ever to increase your practice's cash flow!*

DrsLink and Transworld Systems have developed a NextGen interface that is easy-to-use and will:

- Send account data from NextGen directly to Transworld Systems for collection – **Practices can submit accounts to Transworld Systems in a matter of seconds.**
- Automatically find reductions in the balances of accounts that have been submitted - **Information on payments is automatically sent to Transworld Systems each time the practice launches the DrsLink program. Paid accounts are automatically marked "Paid In Full."**
- Stop or suspend accounts directly from the NextGen platform without logging on to Transworld Systems' Online Client Portal (OCP) – **Saves the practice time and energy.**
- Make reporting so much easier- **Users can easily create a report of "submitted" accounts and use that report to manually make any desired changes in NextGen. "It's very self-explanatory," said one DrsLink beta tester.**

It's an easy, effective and inexpensive way to increase your cash flow and keep your patients happy. Not familiar with Transworld Systems and their flat-fee, internal collections programs? Contact Jeff Dorsey at 706-854-0162 or email jeff.dorsey@transworldsystems.com.

To receive the online meeting link and see what Transworld Systems has been able to accomplish for other NextGen customers, contact Jeff Dorsey.

Transworld Systems is home to the GreenFlagSM Accelerator and the GreenFlagSM Profit Recovery System. We are redefining the collection agency industry by providing businesses and healthcare organizations with better tools for accounts receivable, debt recovery and past due accounts.

With a success rate 4 times the industry average, Transworld Systems has collected \$6 billion over the past decade for more than 60,000 clients – over 1/3 of whom are in the medical industry.
